

NADH

Description

NADH (Reduced Nicotinamide Adenine Dinucleotide) is a coenzyme naturally present in all living cells. Derived from Niacin, NADH contributes to hundreds of biochemical reactions and is an essential cofactor in the production of cellular energy (ATP). Hence, NADH has shown a positive clinical effect on chronic fatigue syndrome by boosting cellular energy. NADH plays an important role in the synthesis of neurotransmitters such as dopamine, norepinephrine and serotonin, which improve mental clarity, alertness and attention. NADH is also directly involved in the body's cellular immune defense system and DNA repair.

NADH supports cellular energy levels, cell metabolism and cell renewal. As such, it may promote improved sleep quality and reduce cell damage caused by certain treatments such as radiotherapy. With a purity of >98% **Cellife NADH** is of the highest quality in the world.

✓ TGA Approved product

Benefits

- Supports cellular energy production and metabolism
- Reduces free radical damage
- Supports mental clarity and alertness
- Promotes healthy tissue regeneration

Active Ingredients

Active Ingredients	Per Tablet
VITAMIN B3 (Nicotinamide)	18mg

Dosage

Adults: 1 tablet daily on an empty stomach before breakfast (or as directed by health care professional). Not recommended for use by pregnant and/or lactating women. Do not exceed maximum single dose of 4 tablets or maximum daily dose of 8 tablets.

Warnings

- Always read the label.
- Keep out of reach of children.
- Store below 25°C in a dry, cool, dark place. Keep away from heat and direct sunlight. Protect from humidity.
- If you are pregnant or breastfeeding, suffering from a serious medical condition, taking a prescription drug or symptoms persist, consult your healthcare practitioner.
- Vitamins and minerals can only be of assistance if dietary intake is inadequate. Vitamin and mineral supplements should not replace a balanced diet.
- Do not use if the seal is broken.
